Global leader Securetec makes its saliva drug test even faster

Securetec is reducing the testing time to 5 minutes, while simultaneously making its DrugWipe® 5 S saliva test more sensitive to cannabis. 5 ng/mL THC in 5 minutes – these are the new vital statistics of DrugWipe® 5 S. The THC concentration detected is equivalent to a teaspoon of sugar dissolved in an Olympic-size swimming pool.

Global leader Securetec has been one of the pioneers of drug detection since 1995. Today, the DrugWipe® brand stands for maximum reliability combined with simple and hygienic handling. The saliva test has proven itself among professional users such as traffic police, customs officials and the public security sector worldwide, and is currently used in more than 30 countries on 5 continents. DrugWipe® S 505 G will be available from November 25, 2016.

About Securetec Detektions-Systeme AG

Established in 1995, Securetec Detektions-Systeme AG develops leading edge technology to facilitate the detection of drugs and hazardous substances. We detect to protect – Securetec is proud to play a part in making today’s world a safer one.

Securetec technologies are successfully employed across a multitude of applications. In-house development and production facilities ensure that our products meet the highest clinical standards.

Matters of security demand sensitivity and confidentiality – by close cooperation with our customers we can identify their specific needs and develop solution for effective day-to-day use.

Securetec provides solutions for traffic safety, customs and drug enforcement authorities across the globe as well as clinics and private companies. Our products guarantee fast, reliable detection of a diverse range of drugs and hazardous substances. For corporations, educational institutions and prevention organizations, we offer consultancy service. With our extensive experience of the rapid identification of drugs and hazardous substances, we can develop and implement security concepts and training tailored to an organization specific requirement.
